

USA-Crawler

Robotic Sewer Crawler

The revolutionary USA-Crawler is a Robotic Sewer Crawler, which runs on batteries and is steerable, lightweight, emission-free, portable, and ready for the future. One of the smallest units available on the market, this European-made device can inspect straight 4" (100mm) pipes. It is lightweight enough for one person to pick up, move to a jobsite. This crawler may be utilized in larger pipes up to 39" (1,000mm) with larger wheels, LEDs and camera elevator attachment.

300 meter Auto Drum
4" to 39" Pipes
Pan & Tilt with 'auto-home' to simplify operation
Complete system fully waterproof to IP67 and Crawler is IP68
Full days operation with supplied batteries
Wifi App Compatibility
Reversing camera
96lbs Case including crawler and accessories
50lbs Cable Drum
Inclinometer
Powerful locating sonde
Lithium-Ion powered batteries
4mm Kevlar cable
300m length
Steerable
